# Parent Newsletter

After school programming consists of several daily rotations. We feature academic programming Monday-Thursday, while Fridays are Fun Fridays featuring guest speakers, games, and a break from the hard work students have done all week. We're looking forward to another outstanding year! The academic rotations are as follows:

In the computer lab, students utilize the ALEKS, Study Island, and Star Fall programs.

Students have time to work on homework.

Students participate in small group math activities focused on current classroom curriculum.

Students focus on reading through the individualized, skill-card based Leap Track program.

Students participate in elective activities including: art, gym, and Second Step presentations.
